

Dear Re-Districting Committee,

I am writing to urge you to stop gerrymandering districts during the upcoming redistricting process. While I recognize this is a complicated issue I urge you to uphold the fairness of maps utilizing tested efficiency metrics to ensure districts in Illinois are as fair, contiguous, and compact as possible. Our Democracy relies on having many voices at the table and fair maps are the first step toward that goal.

I follow this issue very closely and it is the topic that I take action on most passionately through following information from the League of Women Voters, Common Cause, and the Brennan Center for Justice. I believe this issue is more important than party affiliation and demand that both Republicans and Democrats follow transparent and fair practices.

Thank you for approaching this process in a neutral and fair fashion to keep the integrity our electoral process and promote stability in our society.

Sincerely,
Scott Witz
